SCHEDULE

Foreshore and sea-bed affected

Approximately 1.87 hectares of foreshore and sea-bed from Chung Hom Kok to the eastern boundary of the Hong Kong Special Administrative Region (HKSAR), as delineated and shown by a bold red line on a plan, numbered HKM10503, deposited in the Land Registry.

Description of the undertaking and the manner in which the foreshore and sea-bed will be affected by the proposed undertaking

- (i) Installation of an optical fibre submarine cable of approximately 37.5 kilometres in length and 47 millimetres in diameter. A cable-laying barge will be employed to simultaneously lay and bury the submarine cable in a trench of about 0.5 metres in width at a target burial depth of about 5 metres below the sea-bed. For the cable section near the shore, the cable will be installed by divers and protected by articulated pipe.
- (ii) At the crossing with an existing gas pipeline, the proposed cable will be laid by either the burial tool or divers at a depth of about 1 metre below the sea-bed and over the gas pipeline, for a section of approximately 200 metres to avoid any interference. Additional cable protection by 'Uraduct' will be employed.
- (iii) Where the proposed cable crosses with the existing submarine cables, a shallower burial depth up to about 3 metres below the sea-bed, where possible, and over the existing cables will be adopted. The actual burial depth will be subject to the actual depth of the existing cables.
